Profile Summary

A skilled and dedicated **Frontend Developer** with expertise in **ReactJS**, **TailwindCSS**, and modern web technologies like **Firebase** and **MongoDB**. Passionate about solving technical challenges and creating modern, user-friendly websites. Ability to learn new technologies quickly and deliver projects on time.

Technical Skills

Front-End Development: React.js, JavaScript (ES6+), Tailwind CSS, Bootstrap
Back-End Development: Node.js, Express.js, REST APIs, JWT Authentication
Database Management: MongoDB
Authentication: Firebase
Tools & Version Control: Git, GitHub, NPM
Libraries & Frameworks: React Router, Axios
Deployment & Hosting: Vercel, Netlify, Surge, Firebase

Soft Skills

- Adaptable and quick to learn
- Strong attention to detail
- Problem-solving mindset
- Effective communication

Problem Solving

- Solved 100+ basic and intermediate-level problems on Codeforces and BeeCrowd using C++.
- Strong understanding of algorithm design and data structures, including arrays, functions, and efficient problem-solving techniques.
- Continuously improving logic-building skills through competitive programming and coding challenges.

Projects

Tutor Bridge (Tutor Management)
October 2024-present
Features:
- Developed a fully responsive platform enabling users to search, filter, and book tutors based on subject, price, and ratings.

- Integrated a real-time database for managing tutor details, booking data, and user feedback.
- Enhanced performance by optimizing database queries and minimizing page load times.

Github: https://github.com/rafirabby13/tutor-bridge

Technologies used: ReactJS || TailwindCSS || Firebase || Node.js || Express.js || npm

Multi-Vendor Medicine Selling (E-commerce)

January 2025 – Present

Features:

- Implemented real-time inventory tracking to ensure stock accuracy.
- Developed an advanced search and filtering system for easy product discovery.
- Secured user authentication and role-based access control using Firebase.

Live Site: https://multi-vendor-medicine-selling.web.app/

Github: https://github.com/rafirabby13/multi-vendor-medicine-seller-client

Technologies Used: ReactJS || TailwindCSS || Firebase || Node.js || Express.js || React Router || npm

Athlete Zone (E-commerce)

November, 2024-present

Features:

- Utilized ReactJS for a dynamic front-end and MongoDB for efficient data management.
- Enhanced user experience with advanced search and filtering features
- Developed an event management system that allows organizers to create, update, and monitor products to the real-time database.

Live Site: https://athlete-zone-f7a74.web.app

Github: https://github.com/rafirabby13/athlete-zone

Technologies Used: ReactJS || TailwindCSS || Firebase || Node.js || Express.js || React Router || npm

Education

Master's of Science in Information Technology
Jahangirnagar University [Savar, Dhaka, Bangladesh]
2024 - Present

Hobbies and Interest

- Passionate about playing online games that challenge strategic and critical thinking. Dedicated tuition
- teacher, guiding and mentoring students in their academic journey. Enthusiastic cricket player, actively
- participating in matches and maintaining a keen interest in the sport.

Language

- Bangla (Native)
- English (Professional Proficiency)
- Hindi (Fluent)
- Urdu (Fluent)
